

Nursing Assistant Pre-requisite Guidelines:

Completing the HLTH 1110 course at NTC meets the Nursing Assistant pre-requisite. Your NTC transcript, showing a grade of A, B, or C (D is *not* accepted), is all the documentation that is needed. If you took the class previously, be aware that course completion must be within five years of your expected program start date.

Other acceptable means of meeting the Nursing Assistant pre-requisite for the nursing programs are below. Documentation may consist of:

- Transcript or official course completion certificate from an approved training program showing successful completion of a Nursing Assistant course within five years of planned program start
- Copy of your Nursing Assistant Registry certificate from an appropriate regulatory agency (State Department of Health) dated within five years of planned program start

Submit your documentation to NTC Admissions.
